See reverse for TEA, HOT CHOCOLATE and COLD DRINKS

Coffee by Workshop Coffee Co. - Bethnal Green

Our coffee is roasted by much acclaimed London micro roastery, Workshop Coffee Co. Our recipe changes depending on the coffee but typically we extract a 35 gram shot from 21 grams of coffee in around 30 secs. We use organic whole milk and steam to the optimum temperature of 55-60c.

Espresso

A 35 gram shot of coffee from a dose of 21 grams of just ground beans. This forms the basis of all the other drinks below.

2.2

Cortado

A 35 gram shot of coffee blended with textured milk served in a 5oz glass. Great for those who like a little milk and a strong coffee flavour.

2.5

Flat White

A 35 gram shot of coffee blended with textured milk in a 6.5oz cup. Perfect for those wanting a little extra milk but a well pronounced coffee flavour.

2.7

Cappuccino

A 35 gram shot blended with textured milk in a 8.5 oz cup making this is a slightly stronger flavoured option than the latte.

2.8

Latte

Here we reduce the shot to 25 grams and blend with textured milk in an 8oz glass making it a longer, milkier drink but enough coffee to appreciate the flavour.

2.8

Long Black

35 grams of espresso poured into hot but not boiling water in a 6.5oz cup. The hot water version of a flat white.

2.3

Americano

35 grams of espresso poured into hot but not boiling water served in a 8.5oz cup producing a slightly less strong flavour than the long black.

2.3
